BOB WOLF
Physical Education Teacher
Eagle View Middle School, Mechanicsburg, PA

Launched an initiative that saved a life

• Lobbied his school district to install Automated External Defibrillators (AED machines) at their schools

• Ensured that the machines were not only installed, but also that multiple school staff members received training on how to use them

• Used one of these devices to save a life when the mother of a student suffered a cardiac arrest at a Cumberland Valley water polo match

• Was told by the paramedics who arrived at the scene that the woman would not have survived without his intervention
